Employment history

Sep 2024 - Present

Simulation Engineer I U.S. Army Mission Training, SAIC, STE-CFT

Orlando FL

As a systems and sim software engineer supporting the defense contracting industry through the U.S. Army's Synthetic Training Environment Cross-Functional Team (STE-CFT)

- Lead developer and designer on the STE Mission Planning Toolkit (SMPTK), a critical government acquired platform build for GUI tool creation for scenario control, mission deployment, photogrammetry using drones, networked simulator integration and automation for VBS4 terrain generation One step closer to a full One World Terrain.
- Developed a two-way DIS bridge through between BVI/VBS4 and MSFS 2024, proposed as a reusable GOTS solution to accelerate LVC interoperability for Battle Road.
- Assisted with the development of training materials for US ARMY training
- Managed the development, design, implementation, operation, and support of the assigned applications.
- Effectively assisted client departments by analyzing data and the need of the department
- Made process re-design recommendations to improve performance when necessary.
- Advised, guided, and trained company employees regarding system usage and Functionality.

May 2024 - Dec 2024

IT Admin and hardware technician, TechBayUSA

Orlando, FL

- Diagnosed and repaired 150+ devices, restoring full functionality.
- Managed system imaging, cutting setup times by 40%.
- Implemented maintenance plans, reducing repair needs.
- Resolved network issues for businesses and schools.
- Provided remote support using TeamViewer and CLI tools.

Jul 2020 - Present

Shift supervisor , Waffle house

Only work weekends, worked as a shift lead in the morning shift.

Education

Aug 2022 - Feb 2025

BSc, Simulation Software Engineering

Full Sail University, Winter Park, FL

Graduated valedictorian of class

Projects

STE Mission planning toolkit suite Launcher

One-click terrain creation tool

This quick menu GUI is the next level navigation portal for all FIRST ARMY units to use and select their virtual training tools including my One-click Conversion Tool that takes Drone photogrammetry and allows a very easy to use drone photo to terrain for VBS for embedded training.

Boop It (Unity Game)

3D first person shooter music platformer

A first person rhythm platformer where the world and your movement are synced to the beat of the music. This was my midterm project at Full Sail University. I made it with a team of three other developers and a friend who made the soundtrack.
